

## **BRUNOX<sup>®</sup> Deo for cycle forks**

recommended by ROCK-SHOX<sup>®</sup>

Like daily tooth care the endurance and function of a bicycle fork can only be guaranteed by thorough and regular maintenance.

A little BRUNOX<sup>®</sup> Deo is sprayed on between submerge- and stand-pipe before and after each tour. Afterwards, spring the fork shortly for several times and you can see suddenly the difference.

BRUNOX<sup>®</sup> Deo keeps the sealing rings in soft condition and does not adhesive dust. Optimal conditions for best performance.

**BRUNOX<sup>®</sup> Deo has an excellent penetration ability because of the additive TURBOLINE, keeps the sealing rings smooth, so that you can execute your work even better.**

Spray a little BRUNOX<sup>®</sup> Deo on to the fork pillars before and after each ride and see the significant effect. BRUNOX<sup>®</sup> Deo keeps the sealing rings flexible whilst resisting dust; ensuring optimal conditions for best performance.

BRUNOX<sup>®</sup> Deo protects seals, adjusting screws, fixings and all pneumatic parts of the forks. A few drops after cleaning will act as a barrier to dirt and ensure long term protection.

BRUNOX<sup>®</sup> Deo is also recommended by SITTING BULL<sup>®</sup> for sprung seat pillars.

Deo stands for:

Easy care with great effect!
