

BRUNOX® IX 100

High-Tec long-term corrosion inhibitor Sealing

● strong adhesive, honeywax-like, hardening corrosion inhibitor Sealing

➔ protection against corrosion if chromium-plate/galvanizing is impossible or not wanted, for shafts, springs and so on.

➔ for conservation of hollow spaces

➔ for long intermediate storage of semi-finished products, moulds, and so on – up to 5 years

➔ storage outside during winter / summer and so on – up to 1 year

➔ sea transport

X Anti-corrosion- intervals - so long as not before !

- Corrosion inhibitor of 25-50 my
- Heat resistant up to approx. 80 °C

Package size:

spray: 300 ml,

bulk: 5 l, 20 l, 200 l

product is thixotrop,
it gets liquid through shaking,
for painting / deeping or
application by spraying pistol.

The bulk quality can be diluted with white spirit or with Napar according to request, at a dilution 1:16 there results a transparent hardening anti-corrosion film with shorter anti-corrosion interval.
